PROFILE

ISE Graduate | Aspiring AI Operator

Information Science & Engineering graduate with hands-on experience integrating AI APIs into production applications and a strong focus on prompt engineering, LLM-powered features, and AI-assisted development workflows. Built Nexus Learn — a multi-role school management platform where I integrated OpenAI API to auto-generate structured student performance reports using prompt-engineered API calls, replacing manual effort with an intelligent automated module. Also deployed Shale-Namma Pride, a live bilingual school communication system used by real schools. Received an "Excellent" internship rating by delivering assigned modules ahead of schedule. Looking to contribute to teams building or operating AI-powered products and workflows.

EXPERIENCE

Android Developer Intern – MindMatrix

Learning – Feb 2026 – May 2026 · Bengaluru

CL Infotech Pvt. Ltd. (VTU MoU Partner)

- › Developed Android application features using Kotlin and Jetpack Compose during a 3-month internship.
- › Designed and implemented UI screens, navigation flows, and form validations aligned with product specifications.
- › Integrated Firebase Authentication and worked with backend services for user management and real-time data handling.
- › Used AI-assisted development tools to accelerate debugging, code refactoring, and feature delivery.
- › Prepared project documentation and submitted all assigned modules within deadlines.
- › Received an “Excellent” performance rating from the organisation.

PROJECTS

Shale-Namma Pride ↗ shalenammaprider-b4fc8.web.app

A live school communication system — teachers post meal menus and announcements from an Android app, and parents see those updates instantly on a website without refreshing. Deployed for real schools with full bilingual support in English and Kannada.

Kotlin · Jetpack Compose · Firebase Auth · Firestore · React.js · Firebase Hosting

JATHIN'S Learning Hub ↗ github.com/pruthviraj-b

A full-stack tuition management platform with separate dashboards for teachers and students to track sessions, progress, and schedules. Built with a clean REST API backend and a modern web frontend.

Next.js · Node.js · Express.js · Prisma ORM · JavaScript

Nexus Learn ↗ github.com/pruthviraj-b/nexus-learn

A multi-role school management platform for Admins, Students, and Parents — with AI at its core. Integrated OpenAI API to auto-generate structured student performance reports using prompt-engineered API calls, eliminating manual report effort. Supports real-time messaging and role-based dashboards across all three user types.

Next.js 14 · TypeScript · Supabase · Prisma ORM · OpenAI API ·
